Why Legal Data Solutions?

Visual discovery can make or break a case. Trust your visual evidence with the experts—
Legal Data Solutions.

Legal Data Solutions has provided legal video services solely to the legal professional for 20+ years. Your critical depositions are handled quickly, professionally, and with the highest production standards, putting your presentation in the best light possible...and helping you win more cases.

The Need For Speed

Legal Data Solutions understands and can respond to your time constraints. Because we do all work in-house, we provide quick deposition scheduling, fast turnaround, complete quality control, and competitive pricing. Our technicians utilize the latest video production tools so you can focus on winning your case.

Video Depositions

We've developed a self-contained, rackmounted Digital Video Recording System that's unobtrusive, reliable, and quick to set up. Combined with one of our highly trained operators, video depositions have never been easier!

Editing

Our editors can accurately and efficiently produce your testimony excerpts, day-in-the-life or site inspection videos professionally and with minimal turnaround.

Video File Storage and Retrieval

You guard written testimony. Now we help you store and preserve your video depositions, too! Our secure on-site archival suite provides you with the ultimate in protection and retrieval of your valuable video testimony.

We offer law firms a complete legal video solution:

technology • technicians • editors
data storage and retrieval

Video Text Sync

Extremely popular with clients, video text sync combines written transcription "in sync" with the video testimony. Now you can search the transcript for instant access to any testimony segment saving you vital time. Our video text sync product can be used with your trial software.
